

STATE OF ALABAMA
OFFICE OF INFORMATION TECHNOLOGY

OIT Policy 420
IT Project Planning

POLICY NUMBER	OIT Policy 420-01
VERSION DATE	April 12, 2016
POLICY TITLE	IT Project Planning
OBJECTIVE	<p>The objective of the IT Project Governance Policy is to maximize the return on IT investments by monitoring and minimizing risks, facilitating interagency goals, and ensuring interoperability and strategic alignment.</p> <p>The objective of this policy is to define the responsibilities of the Project Planning Phase of an IT project and to give direction on how to fulfill those responsibilities.</p>
AUTHORITY	<p>The authority of the Secretary of Information Technology to create and enforce policies relating to Information Technology is derived from the following legislation:</p> <p><i>The Code of Alabama, Sections 41-28-1 through 41-28-8, (Act 2013-68)</i></p>
APPLICABILITY AND SCOPE	<p>The requirements and responsibilities defined in this policy apply to all departments, agencies, offices, boards, commissions, bureaus, and authorities, thereafter named “agency” and authorized individuals in the employment of the state responsible for the management, operation, or use of State IT resources.</p> <p>This policy shall not apply to counties, municipalities, the Alabama State Port Authority, or institutions of higher education governed by a separate board of trustees, unless these entities or institutions enter</p>

into cooperative agreements and/or contracts related to Information Technology efforts with the State, in which case they will be bound by this policy and the standards implementing its application and enforcement.

This Policy applies to new and existing IT projects that meet the criteria for IT Governance.

STATEMENT OF POLICY

This policy is designed to ensure that the appropriate processes are followed for the Project Planning Phase of an IT project and the appropriate documents are presented to OIT for review, guidance and compliance.

OIT will determine whether information technology initiatives are compliant with the State's IT policies, standards, and Strategic Plan during governance.

OIT will communicate compliance issues or unresolved exceptions to project sponsors and will work with agency leadership to develop solutions or corrective action plans.

AGENCY RESPONSIBILITIES

Agencies are responsible for following the IT Governance process when engaging in the planning of an IT Project.

During the Project Planning Phase, agencies must submit the Project Management Plan using the Project Planning Template (420T1) to OIT for review.

If requested by OIT, the agency may subsequently be required to update the Project Plan (420T1).

OIT RESPONSIBILITIES

The Office of Information Technology, under the authority of the Secretary of Information Technology, will promulgate IT project policies, standards, procedures and guidelines.

OIT responsibilities during the Project Planning Phase are, but not limited to, the list below:

- Review the submitted Project Management Plan (420T1) for completeness and compliance.
- Ensure that there is appropriate balance between costs, risks, long-term and short-term benefits.
- Respond to the agency if more information is needed.
- If project criteria are met, approve the Project Management Plan (420T1) and notify the agency to proceed to the Execution and Control Phase.
- If the Project Management Plan does not meet the criteria for approval, contact agency leadership to develop potential solutions and corrective action plans.

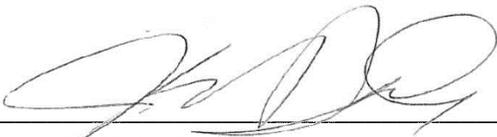

EFFECTIVE DATE

This Policy shall be effective upon its approval by the Secretary of Information Technology, as evidenced by the signature of the Secretary being affixed hereto.

SUPERSEDES

This is the initial policy and does not supersede a previous version.

The undersigned, as Acting Secretary of Information Technology of the State of Alabama, exercising the power vested in that Office by the laws of this State, declares this Policy to be adopted as of the 12 day of April, 2016.

Joanne E. Hale, PhD
Acting Secretary of Information Technology
